

Specification

1. The specification is objected to because of the following informalities: "a CMOS camera" recited in page 5, line 3, should be changed to "a complementary metal oxide semiconductor (CMOS) camera" for a clear recitation. Also, "a CCD camera" recited in page 5, line 3, should be changed to "a charge coupled device (CCD) camera" for a clear recitation. Correction is required.

Claim Rejections - 35 USC § 112

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

3. Claim 2 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

4. In claim 2, line 11, the term "the main electrode" is indefinite because there are more than one main electrodes positioned midway between the uppermost and lowest one. Therefore, it is unclear which one the applicants try to claim. It is suggested to change to "one of said main electrodes" for a clear recitation.

5. Claims 1, 3 and 4 are allowed.

Response to Amendment

6. Applicant's arguments with respect to claims 1-4 have been considered but are moot in view of the new ground(s) of rejection.

7. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP
